Alerting Abstract US A1

NOVELTY - Wallet consolidator has memory for storing information including personal identification data such as driver's license data, checking account data and scanned personal image and smart card interface for communicating with a smart card.

USE - Wallet consolidator for point of sale transaction devices/computers used in supermarket for electronic commerce and for performing membership ID admittance, hospital, health club, medical insurance, event ticketing and money transfer type transactions.

ADVANTAGE - Enables to use customized set of identification data to facilitate a transactions or event of a specific type. Allows usage of existing magnetic strip readers, allows for a single swipe of the card to provide all the information in one pass and enables to hide additional information and use additional information effectively.

DESCRIPTION OF DRAWINGS - The figure shows the transaction flowchart of the process for associating identification and personal data.

Alerting Abstract US B1

NOVELTY - The card (20) is provided with at least one track originally containing data. Additional data are written on the track between a set of special control codes. The additional data are written subsequent to the initial data being placed on the track.

USE - Magnetically encoded card e.g. credit card.

ADVANTAGE - Allows use of conventional types of magnetic stripe readers currently being used in most retail establishments. Provides all information with single swipe of card through magnetic stripe reader.

DESCRIPTION OF DRAWINGS - The figure is the track layout of the magnetically encoded card.

20 Magnetically encoded card

Alerting Abstract WO A1

NOVELTY - A magnetic stripe reader/writer (220) reads and writes information from and to magnetic stripes. A keypad (150) is provided for inputting user selections and commands. Information provided read from

magnetic stripes is stored in a memory of the consolidator. A smart card interface (170) effectuates communication between the consolidator and a smart card.

DESCRIPTION - The barcode pattern capable of being scanned by a barcode reader, the text and graphics are displayed in a display screen (200). An INDEPENDENT CLAIM is also included for method for warehousing information in wallet consolidator.

USE - For electronic smart card, various types of credit, debit, identification and other types of authorization cards for storage of information pertaining to electronic commerce and consumer identification.

ADVANTAGE - Allows use of a single smart card to hold various information contained on several cards.

DESCRIPTION OF DRAWINGS - The figure shows perspective view of wallet consolidates.
